

# GREAT AMERICAN ROOT BEER SHOWDOWN

## Root Beer Flavor Tabulator

**Instructions:** First enter the number of reviewers and number of root beers in your test. Then fill in the scoring grids with the ratings from your score sheets. The Root Beer Flavor Tabulator will compute the average scores for each root beer and provide the results in the lower right of the page. If you've modified the rating categories for your test, you can change the default categories at the top of the grid. If you'd like, you can identify each reviewer and keep a record of their taste preferences over time, or simply leave them anonymous. To complete the record of the test, fill in the true identities of each lettered sample next to the scores in the lower right. Print a copy of this tally sheet to compare all the final scores after several rounds of tests.
